Professional Summary

Data Analyst with a Bachelor of Data Science and hands-on experience transforming raw operational data into actionable business insights. Strong in SQL, Excel, Power BI, and Tableau, with experience in KPI tracking, dashboard development, and revenue impact analysis. Proven ability to clean complex datasets, identify performance trends, and support data-driven decision-making in retail, startup, and enterprise environments.

Technical Skills

Data Analysis & Querying:
SQL (Joins, Aggregations, Data Validation), Data Cleaning & Transformation, KPI Analysis
Visualization & Reporting:
Power BI (Dashboard Development), Tableau, Microsoft Excel (Pivot Tables, Lookup Functions, Trend Analysis)
Programming:
Python (Pandas, NumPy)
Data Management:
ETL Concepts, Relational Databases (PostgreSQL, SQL Server), Data Quality & Reporting Workflows
Tools:
Jira, Confluence

Education

Professional Year **Feb 2026 - Present**
Performance Education, Sydney NSW
Key Subjects: Australian Business Culture and Environment, Achieving Career Success, Australian Workplace Skills and Professional Business Communication, Professional Meetings and Presentations

Bachelor of Data Science **Sep 2023 – May 2025**
SP Jain School of Global Management, Sydney NSW
Key Subjects: Business Analytics, Data Warehousing, Database Systems, Big Data Processing, Probability & Statistics, Advanced Analytics, Machine Learning

Projects

IPL Advanced Performance Analytics & Pre-Tournament Insight Pack **Mar 2023**
Independent Project

- Consolidated and cleaned 17+ seasons of IPL performance data using SQL and Python.
- Designed structured Excel models and interactive Power BI dashboards to analyze strike rates, economy metrics, matchup trends, and situational performance indicators.
- Conducted exploratory and comparative analysis to identify strengths, weaknesses, and predictive patterns for the upcoming season.
- Translated findings into monetized pre-tournament insight packs used by fantasy sports participants and sports analytics consumers.

Outcome: Converted raw historical datasets into commercially viable, insight-driven products demonstrating end-to-end analytics capability.

Storysphere – AI-Driven Story Generation Game **Feb 2025**
Capstone Team Project, SP Jain School of Global Management

- Structured backend data flows and validated output consistency across AI-generated content pipelines.
- Supported KPI definition and performance tracking for user engagement metrics.
- Analyzed workflow bottlenecks and supported iterative improvements based on system performance feedback.
- Coordinated data validation and reporting processes within an Agile team environment.

Outcome: Delivered a fully functional AI-integrated platform through structured requirement definition, coordinated execution, and documented system design. Passed with distinction.

Employment History

Duty Manager **Sep 2024 - Present**
Dan Murphys, Parramatta

- Analysed store-level sales data to identify high-performing categories, contributing to a 50%+ increase in revenue.
- Monitored daily revenue, inventory turnover, and demand trends to support stock optimization and sales strategy.
- Implemented data-informed merchandising decisions aligned with sales KPIs.
- Delivered performance insights to management to support operational decision-making.

Finance Manager (voluntary) **Sep 2025 – Present**
XTSY Events & Productions, Sydney

- Tracked revenue, ticket sales trends, marketing conversion metrics, and cost structures to support profitability analysis for 3 events that attracted an average of 250 attendees.
- Built post-event performance summaries highlighting revenue drivers and optimization opportunities.
- Identified high-engagement marketing channels through performance analysis to improve ticket conversion rates.
- Supported data-backed decision-making across marketing and operational teams.

ETL Engineer **Nov 2022 – Apr 2023**
Splash Business Intelligence, Hyderabad, India

- Developed and optimized complex SQL queries (joins, aggregations, subqueries) to support automated HR performance dashboards and KPI reporting.
- Cleaned, transformed, and validated large operational datasets (10,000+ records per reporting cycle), improving data accuracy and reducing reporting discrepancies by approximately 20%.
- Supported ETL workflows to streamline data extraction, transformation, and loading processes, contributing to faster report generation cycles.
- Performed data quality checks, reconciliation processes, and validation testing to ensure consistency across reporting outputs.
- Collaborated with business stakeholders and reporting teams to translate performance metrics into structured dashboards and actionable insights.

Achievements & Certifications

- Google Data Analytics Certification
- Alteryx Designer Certification
- Tableau Data Visualization Certification
- IEEE Publication – Enhancing Data Centers to Reduce High Energy Consumption
- Monetized IPL analytics insight pack (independent commercial project)
